

software-processes

Building the Project

`./gradlew build`

Running the Application

Start directly via Main (run java at top)

Generating PDF from Markdown

Option 1: Using Batch Script (Windows)

Double-click `generate-pdf.bat` in the project root

Option 2: Using PowerShell Script

`.\generate-pdf.ps1`

Option 3: Manual Command

First, install Pandoc: - **Download:** <https://github.com/jgm/pandoc/releases/latest>

- **Or use Scoop:** `scoop install pandoc` - **Or use Chocolatey:** `choco install pandoc` (requires admin)

Then run:

`pandoc README.md -o README.pdf`

This will create a `README.pdf` file in the project root directory.
